SIR:

In response to the Office Action dated March 3, 2003, please  
amend the above-identified application as follows:

IN THE CLAIMS:

Please amend Claim 1 as follows:

1. An apparatus for separating soil, the apparatus comprising:
- a frame;
  - an axle associated with the frame;
  - a cylinder associated with the frame;
  - discs attached to the frame wherein the discs are aligned on  
and attached to the axle between the frame and the soil and further  
wherein the discs rotate upon contact with the soil; and
  - a controller associated with the cylinder wherein the  
controller is remote from the frame and controls movement of the  
frame such that the discs are moved with the frame and wherein the  
frame pivots with respect to the axle.
